

## SMARTWAY TRANSPORT PARTNERSHIP

Carrier Partner:

The "SmartWay Transport Partnership" is an innovative collaboration between the Environmental Protection Agency (EPA) and the freight industry to increase energy efficiency while significantly reducing greenhouse gases and air pollution. BNSF Logistics has joined the EPA in this voluntary effort as a Partner to promote our sustainable business practices and environmental commitment. We recognize that the goals of business and environmental stewardship are not mutually exclusive.

As one of our partner freight carriers, we invite you to join us in improving efficiencies. Once you learn about this exciting effort, and the benefits that it offers your business, we are confident you will agree to come aboard.

The application process is simple: sign a voluntary Partnership Agreement, calculate your efficiency, and make a commitment for annual improvements that will ensure additional reductions over time.

BNSF Logistics has made commitments to ship more of our goods over time with higher scoring carriers that have committed to efficiency improvements. We know that doing business the "SmartWay" will help all of us to become more competitive in our industry, improve our public image, and foster more sustainable business practices that will have a lasting impact.

To find more useful information about the program, click to [www.epa.gov/smartway](http://www.epa.gov/smartway), call the Partnership hotline at 734-214-4767, or e-mail [smartway\\_transport@epa.gov](mailto:smartway_transport@epa.gov).
